Common control questions

 Check SLA for INC0010001

 List breached or at-risk work

 Explain the project workflow

 How do I justify a breach?

 Show dashboard summary

Demo mode: responses use local incident and justification data. No network connection is required.

SLA Governance Virtual Agent

Register-aware guidance for service desk managers

● ONLINE

VA

Welcome to the SLA Governance Virtual Agent. I can read the local incident register and help you decide what needs attention.

Ask about SLA status, risk, breaches, or the dashboard...

 Send

ACCOUNTABILITY TRAIL

Mandatory for breaches

Breach justifications

Capture the operating context behind every PI miss. Submitted records stay local to this demo and remain available after reload.

Submit a justification

Be specific enough for a manager to review without a follow-up.

Breached incident

Breach reason

Technical Complexity

Detailed explanation *

Explain the timeline, dependency, and recovery action...

A useful justification names the cause, customer impact, and prevention step.

Submit for review

Review guidance

Use a consistent decision trail

01

Name the cause

Vendor, dependency, assignment, or technical constraint.

02

Describe the impact

State what was delayed and who was affected.

03

Close the loop

Include the prevention or follow-up action.

Submitted records

1 submitted

Manager review status for every justification.
